## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after the final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 01, 2006 has been entered.

### ***Response to Amendment***

2. Applicant's arguments filed on August 01, 2006 with respect to claim 20 have been fully considered but they are not persuasive for the reasons set forth in detail below (see *Claim Rejections - 35 USC § 102* below)

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. **Claim 20 is rejected under 35 U.S.C. 102(e) as being anticipated by Douk et al (U.S. 6,911,036).**
5. Referring to **claim 20**, Douk et al disclose a system for treating a vascular condition (see Figs. 4 and 5), the system comprising: a hollow Guidewire 144; a core wire 142 inserted through the hollow guidewire, the core wire including an undulating section 160 carried within the hollow guidewire for providing frictional control of the expansion and contraction of an embolic containment device 25 or occluder device based on a direction of axial translation within the hollow guidewire. The tapered undulating section 160 is frictionally contacted an inner surface of the hollow guidewire (see col. 4, line 11 to col. 5, line 8). Douk further discloses an embolic filter device 25 or occluder device 320 (see Fig.13 and col. 8, lines 54-55) coupled between a distal end 27 of the hollow guidewire and a distal end 48 of the core wire. With respect to the limitation "providing a different amount of friction based on a translational direction of the core wire within the hollow guidewire". Here it is noted that Douk discloses a core wire having frictional control means disposed within the hollow guidewire. Douk also discloses that different amount of friction can be achieved by selecting the amplitude, or maximal transverse dimension of bends 160 is selected (see col. 5, lines 45-50).

***Allowable Subject Matter***

6. Claims 1, 4-17 and 19 are allowable over prior art of record.

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan V. Nguyen whose telephone number is 571-272-5962. The examiner can normally be reached on M-F: 9:00 AM - 5:30 PM.
